

Organic Coco Coir all purpose potting mix

Coco Earth™

Coco Earth™

Coco Earth

- * 50/50 moisture to air ratio
- * maintains ratio for 3 years
- * can be re-used over 3 year period
- * releases moisture slowly to plant over 3 days period
- * minimal to no weed presence medium
- * no bugs present in medium
- * neutral pH and resistant to disease and fungus
- * provides better root development for plant

Peat Moss

- * 80/20 moisture to air ratio
- * reduced ratio and compaction after one year of use
- * **Must** be replaced yearly due to hard compaction
- * immediate release of moisture to plant and dries out quickly
- * weeds present in medium
- * bugs present in medium
- * provides prime environment for disease and fungus
- * limits root growth and plant development

Note: Coconut Coir is inert meaning that it has no nutrition. Make sure to add fertilizer when hydrating.

Sizes: 650g, 5kg, Starter pellets, 35L bag

Examples of use:

- o Baskets / Containers
- o Raised garden Beds (50/50 ratio to reduce watering)
- o Lawn mulch
- o Rooting media for cuttings
- o Organic soil conditioner

Directions for use:

650 g Brick - Put the brick in a small bucket. Add 2-3L of warm water to the brick. When the brick has expanded add 3 tbsp of Grotek Total Nourish Powder and mix well. Add sand or perlite to increase drainage. Will expand to make 0.3 cu. ft. of soil amendment.

5 kg Block - Put block in an empty garbage can or a wheelbarrow add 16L of water and let it sit overnight. Add 1 cup of Total Nourish Powder and mix in well. Add sand or perlite to increase drainage. Will expand to make 2.1 cu. ft. of soil amendment.

35 L Bag - Add 3-4 tbsp of Grotek Total Nourish Powder and mix well. Add sand or perlite to increase drainage.

QUICK TIP:

Coconut Coir is a fiber and contains very little plant nutrition. Be sure to add fertilizer while hydrating. Organic fertilizer if possible!
